SUMMARY

I am a results-driven full-stack web developer with a strong passion for open-source software and a commitment to following best coding practices. With experience in remote pair programming, I am fluent in multiple languages, frameworks, and technologies, and can quickly adapt to new tools and platforms.

As an experienced ICT and digital forensics professional, I have a proven track record of success in both corrective and preventive maintenance. My technical expertise and manual dexterity have enabled me to consistently deliver high-quality work.

In addition to my development skills, I have developed competencies in understanding customer behavior and satisfaction, demand and supply, company debt management and expansion, and networking. I am committed to achieving organizational growth through the implementation of innovative solutions and collaborative approaches.

With over 2 years of professional development experience, I am confident in my ability to contribute to any team and drive the success of any project.

SKILLS

Language: JavaScript.

Front-End: Vanilla-javascript, ReactJs, React-Redux, NextJs, HTML5, CSS3, Sass, Bootstrap, TailwindCSS.

Back-End: Node Js.

Database: Postman, PostgreSQL, MongoDB.

Tools & Methods: Git, GitHub, Bitbucket, Jira, Figma, Agile Development, Netlify, Webpack, Mobile/Responsive Development, Jest, TDD, Chrome Dev Tools.

Professional: Remote Pair-Programming, Teamwork, Mentoring, Research.

Soft Skills: Good written/verbal communication skills, MS word, Excel, PowerPoint, Budget management, Customer service skills, Attention to detail, and Good time management.

EXPERIENCE

STAPLES

Front-end Developer (JavaScript, ReactJs & NextJs)

Oct 2022 - Present

- Developing and implementing highly responsive user interfaces providing good user experiences with 95% accuracy.
- Meeting with the development team twice weekly to discuss user stories, and building solutions to meet those requirements.
- Increase number of visitors and purchases by 25% as a result of UI improvements.
- 300+ visitors who stay at least 30 sec+ on a daily basis.
- Rebuilding the codebase from using CSS file styling to using customized Staples UI library.
- Constantly reviewing software bugs, and reports, highlighting problem areas, identifying quality issues, and creating test reports and solution designs which resulted in 98% smooth DevOps process.
- Documenting application changes and developing updates, monitoring and improving frontend performance.

MICROVERSE

Mentor (Volunteer),

Sept. 2022 - Present

- Mentoring 10+ junior web developers, and providing technical support through code reviews with positive feedback from junior developers.
- Propose over 70% improvements to code organization to improve code quality and overall performance.
- Provide advice and tips on maintaining motivation to maintain longevity in the program.

REWORKS TECHNOLOGY

Front-end Developer (JavaScript, React.js & Node Js)

Jun 2022 – Jan 2023

- Built over 10 responsive and fully functional frontend applications with React JS.
- Spent 1300+ hours in building and executing the app
- Worked as a team to deploy applications to production using various tools and automate processes.

EDUCATION

REWORKS TECHNOLOGY. (Nigeria)

March 2021 – June 2022

JavaScript

- Spent 1500+ hours mastering algorithms, data structures, Backend and front-end development while simultaneously developing projects with JavaScript, React, and Node Js.
- Developed proficiency in constantly reviewing software bugs, and reports, highlighting problem areas, identifying quality issues, and creating test reports and solution designs.

KOGI STATE UNIVERSITY

Jan 2013 – Feb. 2017

B.Sc, Banking And Finance

- Spent 4 years understanding the financial system and it's important to a nation's economy.
- I gained a better understanding of the crucial role that banks play in a country's economy and the significance it holds for investors.
- Examined the Significance of Financial Inclusion for Banks: A Case Study of Access Bank Nigeria Limited From 2013- 2017.
